

Show the steps wise approach how to connect with Sample-Superstore.xlsx dataset. Select Order sheet in it.

Step 1: Click on **Get Data** from the **Data Group** in the **Home Ribbon**. Then select '**Excel Workbook**'.

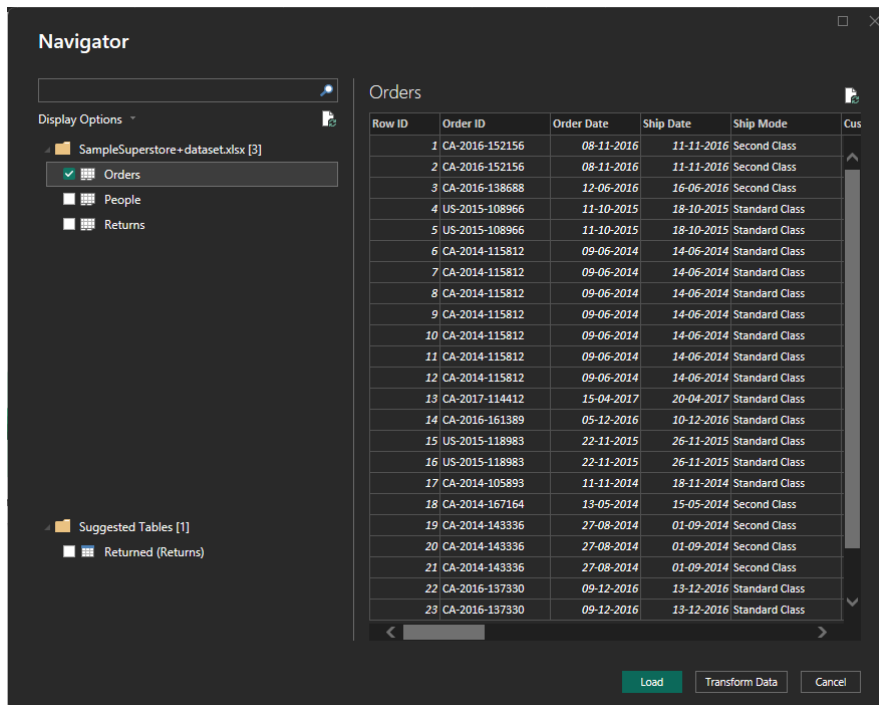

Step 2: A **File Explorer** will open. We can use this to browse our files and select the appropriate file. Select the excel file '**Sample-Superstore.xlsx**' and click on **Open**.

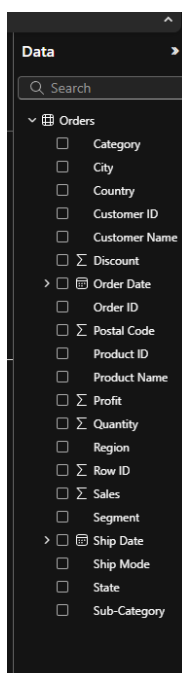

Step 3: Another window opens up that display all the worksheets in that excel file.

Click on the white **Checkbox** on the left of '**Orders**' to select the specific worksheet.

Then click on the **Load** button.

Step 4: The data is imported into Power BI. The columns and data present in the worksheet can be accessed from the **Data Pane** which is available at the **rightmost edge** of the Power BI window.
